

Northern Tool & Equipment, Phase 1

Founded in 1990 by Curtis Trenkelbach, InterCon Building Corporation has developed a reputation as a builder who brings value to the construction project. InterCon's reputation is grounded in their ability to design cost effective building solutions while executing those projects with the highest standard of quality in a timely manner. InterCon specializes in self-performing, time efficient, cost efficient, build-to-suit construction on a wide range of projects including commercial, industrial and complete business parks.

InterCon's experience encompasses the following types of projects:

- ▶ Retail
- ▶ Warehouse/Industrial
- ▶ Commercial
- ▶ Interiors
- ▶ Broadcast & Media
- ▶ Institutional

Most of InterCon's work is performed under a negotiated basis. This allows the maximum

General Motors SPO Parts Facility

amount of flexibility for the owner to review the project and incorporate changes as needed throughout the building process. InterCon is devoted to working with all participants in the construction process fairly, from the building owner to the

subcontractors. By doing so, InterCon develops an attitude of trust and cooperation which helps to ensure the successful completion of each project.

Quality Control Statement

InterCon Building Corporation is a commercial construction firm offering superior professional services. Our personnel work together as a fully integrated team dedicated to bringing every project to a successful conclusion. Careful

monitoring of each phase of construction assures that the highest standards of quality, scheduling, and cost effectiveness are attained.

Client satisfaction is our primary objective. We excel in our ability to give our clients a firm, accurate cost and to complete a quality project within budget.

Northern Tool & Equipment

Subcontractors are very important to the success of any project. That's why we've worked hard to establish solid working relationships with only the best. We deal openly and honestly with them. As a result, we have their trust and cooperation, and the assurance of quality work at a fair price.

InterCon Building Corporation's quality control policy is carefully handed down to the skilled construction craftsman, who understands his responsibility to do his work correctly the first time with the expertise to achieve the best quality within the budget. Our quality is achieved through the constant efforts of everyone in the company, from the top down, to maintain pride in what we produce.
